

Honors Precalculus. Summer Math.

These are the basic skills that you need to be absolutely confident and fluent in. Of course, this list is just a small portion of what you've learned so far and you will be expected to know more, but mastering the following will make it much easier to get through the Precalculus.

- Sets of numbers: natural, whole, integer, rational, irrational, real, non-real.
- Operations with fractions: addition/subtraction/multiplication/division/complex fractions.
- Simplifying radicals. Rationalizing fractions with radicals in denominators.
- Number sense. Comparing real numbers in various forms.
- Divisibility rules for 2, 3, 4, 5, 6, 9, and 10. Memorized and applied.
- Recognition if a number is prime or composite (up to 100.)
- Squares of natural numbers up to 20 memorized.
- Most common Pythagorean triplets: 3-4-5, 5-12-13, 7-24-25, 8-15-17, 9-40-41 memorized.
- SOH-CAH-TOA
- Factoring by grouping.
- Special products: square of a sum/difference; difference of squares. Formulas memorized and applied.
- Sum/difference of cubes. Formulas memorized and applied.
- Quadratic formula. (Lifesaving skill ☺)
- Proportions.

Set of problems to practice are included here.

All the answers and solutions to selected problems are enclosed.

You will be quizzed on it sometime in the first two weeks of school.

We will not be reviewing it during class.
